# Web Filtering & Firewall

Firewall Services to Fit Your Security Needs
Eliminate problematic and insecure content from your IT infrastructure.

Protect your Network from Unsafe Web Content

Protect your employees and network by preventing questionable and unsafe content from entering your IT infrastructure.

With MTG's Content Filtering, you can block inappropriate & distracting sites while still allowing employees to perform their jobs. Blocking sites like YouTube and Facebook will lead to a more productive work environment. The intelligent filtering system will automatically detect inappropriate content and block it, and best of all, the system won't slow down your client workstations.

Get enterprise security at a small business price

Cost-effective solutions give you the protection you need without breaking the bank.

The cyber threat landscape is increasing in size and complexity, and this, coupled with mobile access and risky user behavior means your data are at risk. As a result, vulnerabilities lie on every layer of your network. MTG delivers a strong first line of defense, blocking unauthorized users and protecting your organization's valuable data against threats. Unlike other hardware firewalls, MTG's will not allow your users to decide what gets through and what doesn't—leave that to the security experts! We worry about your firewall, and you can relax knowing your information is protected and managed.

"Reclaim your network with MTG IT Web Filtering"

MTG's Security Solutions

· Antivirus

· Anti-malware

· Spam protection

· Virtual Private Networks (VPN)
